DECLARATION

I am SULEKHA JASH, a student of MBA (HR) in THE UNIVERSITY OF BURDWAN here by declare that this project entitled – “EFFECTIVENESS OF TRAINING & DEVELOPMENT FOR THE EMPLOYEES OF WBSEDCL” is a record of independent work carried out by me under the guidance of WBSEDCL as per the curriculum requirement of MBA(HR) course of THE UNIVERSITY OF BURDWAN .

DATE :

PLACE: Purba Burdwan

ROLL NO: BUR/MBA(HR)2022/027

REG NO 201901019622 OF 2019-20

NAME: SULEKHA JASH

ACKNOWLEDGEMENT

Its my privilege to acknowledge each individual those who have given support and guidance to complete this wish to put on records.

I wish to take this opportunity to express my deep sense of gratitude to all faculty members Dr. Nirmal Chandra Roy (project guide) of Master of Business Administration Department , The University of Burdwan , Purba Bardhaman , for their valuable guidance in this project . They have been a source of inspiration and I sincerely thank them for their valuable suggestions to prepare this.

Last but not this least , I render gratitude to my parents for their useful support and inspiration .

Date:

Place: Purba Burdwan

Roll No : BUR /MBA/ (HR) /2022/ 027

EXECUTIVE SUMMARY

During my Internship I gained practical knowledge on how the human resource division of an organization operates and coordinates its activities to ensure smooth functioning of the organization at all levels by ensuring right numbers of people are available at the right time to do the right job.

Not only that I have also gained insight into the working culture of the organization and observed how WBSEDCL handles its employees with value and empowerment to ensure they are motivated to give their best to the organization. The report starts with an organization profile of West Bengal State Electricity Distribution Company Limited giving its background Mission, Vision hierarchy and the organization.

The next section is the comprises the project, Human Resource Management in WBSEDCL. The project encompasses introduction to the topic : EFFECTIVENESS OF TRAINING & DEVELOPMENT FOR THE EMPLOYEES OF WSEDCL. In this chapter contains detailed discussion of EFFECTIVENESS OF TRAINING & DEVELOPMENT FOR THE EMPLOYEES OF WBSEDCL. the followed by Organization Practices which basically conveys how things are done in the HR Department. The next part of the project carries out techniques tools that touches upon strengths, weakness, objectives, research analysis and to the organization followed by findings and recommendation The next part of the project carries out techniques tools that touches upon strengths, weakness, objectives, research analysis and to the organization followed by findings and recommendation on critical factors regarding Human Resource Management of WBSEDCL..Finally, there is the Findings and Suggestions, Conclusion followed by references.

CHAPTER-1 INTRODUCTION

INTRODUCTION

Human resource is the most valuable asset for an organization. Every organization wants to utilize its human resources efficiently and effectively. The overall performance of the organization always depends up on the efficient providing various types of benefits. besides of providing different types of benefits, organization must develop the human resources so that the objective of both individual employee and organization can be satisfied. The training process comprises of a series of steps that needs to be followed systematically to have an efficient training program. The training is a systematic activity performed to modify the skills, attitudes and the behavior of an employee to perform a particular job. Effectiveness of training refers to the impact that a training intervention has as measured by the achievement of the goals set before the training intervention. To enable the assessment of whether the training was effective or not the goals for the training intervention must be agreed upon upfront. Overall the employees are satisfied with the training provided by WBSIEDCL. They think it is effective to increase their performance.

1.1 ABOUT THE TOPIC

TRAINING: Training is teaching or development in oneself or other any skills & knowledge. training has specific goals of improving one's capability, capacity, productivity & performance there are two methods through which employees can improve their knowledge & skills.

A. On the job training. B. Off the job training.

On the job training is very important since real learning takes place only when one practices what they have studied. but it is also equally important in gaining knowledge through off the job training. Learning becomes fruitful only when theory is combined with practical knowledge.

EFFECTIVENESS OF TRAINING:

Effectiveness of training is the measurement of the impact of training on the trainee's knowledge, skill performance & company ROI. The training goals & objective should be determined before training occurs, allowing these to be clearing & accurately measured. Effectiveness of training refers to the quality of the training provides & measuring whether the training met its goals & objective. The perception effectiveness of training is a series of many factors about the pre-training stage, post -training stage & personal factors.

HOW TO DESIGN EFFECTIVE TRAINING PROGRAMS?

The training design process refers to a systematic approach for developing training programs, below figure presents the stapes in this process.

Step: 1 Is to conduct a needs assessment which is necessary to identify if training is need.

Step:2 is to ensure that employees have the motivation & basic skills necessary to master training content.

Step:3 TO create a learning environment that has the features necessary in order for learning to occur.

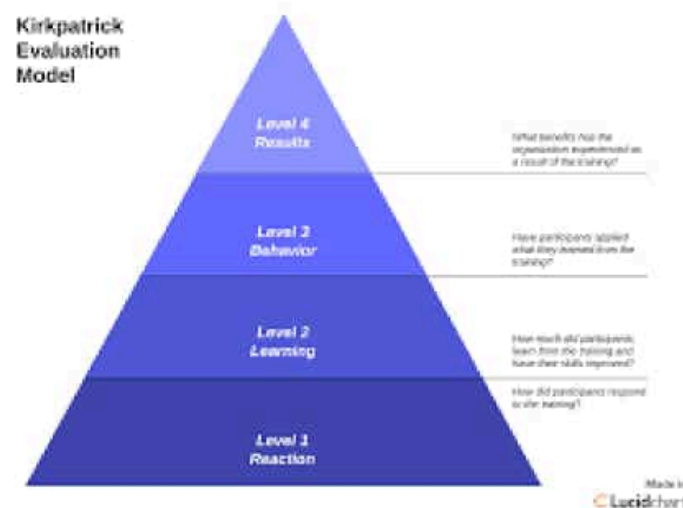

Step: 4 Is to ensure that training apply content to their job. This step involves having the trainee understand how to manage their skill improved as well as getting co-worker & manager support.

Step: 5 Is to develop an evaluation plan. Developing an evaluation plan. Includes identifying what types of outcomes training is expected to influence.

Step: 6 Is to evaluate the program & make change in it or revisit any of the process to improve the program so that learning, behavior change & the other learning objectives are obtained.

HOW TO MEASURE EFFECTIVENESS OF TRAINING?

For During the 1950, Professor Kirkpatrick developed the Kirkpatrick evaluation model evaluating training. 4 level approach this is one of the most successful models that help you measure the effectiveness of customized corporate training programs.

LEVEL 1 REACTION: The first level of the Kirkpatrick model is the reaction level, how the learners reacted to the training. The reaction level evaluates the learner's satisfaction, & motivation with the training. The reaction level can be measured by using surveys feedback forms interviews. THE reaction level help trainers understand the learners' perceptions, expectations, & adjust the training accordingly.

LEVEL 2 LEARNING: The second level of the Kirkpatrick model is the learning level, which measures how much the training. The learning level evaluates the learner's knowledge, skills, & attitude before & after training. The learning level helps trainers assess the effectiveness of the training content, & activities & ensure that the learning objective are met.

LEVEL 3 BEHAVIOR: The third level of the Kirkpatrick model is the behavior level which measures how the learned applied what they learned to their work. The behavior level evaluates the learner's performance, productivity, & quality. the behavior level helps training on the learner's behavior, habits, actions the transfer of learning. it helps learners' performance & delivery at work by using a combination of these methods.

1. Self –assessment questionnaires.
2. Informal feedback from managers.
3. Focus groups.
4. Customer surveys, comments, complaints

LEVEL 4 IMPACT: Measure the tangible results of the training such as reduced cost, quality , project completion , productivity, increased sales. Key metrics to measure are :

- 1) Improved business results.
- 2) Employee retention
- 3) Higher morale
- 4) Customer satisfaction index

FACTORS INFLUENCING THE EFFECTIVENESS OF TRAINING

The factors determining the effectiveness of training may be summarized under three categories . these are as follow -----

- 1) Factor act in the pre- training stage
- 2) Factor act in the training stage
- 3) Factors act in the post- training stage.

There are several factor which undermine to make training effective & attractive for the trainees and similarly few factors also influence in repelling them . The diagram vouches for them as + and –symbol .Example: an environment good enough turns out to be attractive & horrible environment becomes to be repulsive for all . A quality training program might be considered to be +by an exceptional trainee without training remains moderate to the situation . the set of + and factors in the training stages to the described differently for each trainee . only a few factors of spatial important which added to the general &average responds of a considerable group set. Neither the social scientists or nor the trainees directly or indirectly affected fail to understand the factors attracting or repelling the trainees. Effect of training has immediate long –term benefits as well ad organization . therefore we can say that a vague idea and a mystery is lingering over the post training stage and sense of uncertainty regarding the reception of the training program continues to remain . the scenes of the life cycle define the factors related to pre and post training stage .

The pre training stage it can be deemed to be a rigorously erroneous evaluation of the positive +& negative – factors

JEEFERSON & POLLOCK TOLD THAT ABOUT FOUR KEYS TO IMPROVE THE EFFECTIVENESS OF TRAINING PROGEAMS

BEGIN WITH THE END IN MIND

Effective training is training that improves performances and improve performance to help achieve business objectives. Therefore effective training requires knowing & understanding the business objectives.

SOLUTION MAKE SURE TRAINING IS THE RIGHT

Performance can be determined by factors at three level the work place the work itself & the worker Training & development is targeted only at the worker level.

THINK PROCESS NOT EVENT

More intense competition means greater emphasis on performance the need for better performances means more need for effective processes including the process of converting learning into results.

REASONS TO EVALUATE EFFECTIVENESS OF TRAINING

Effective training & learning that actually carries over in a meaningful way don't happen by accident . in order to make your program a true advantage versus just another expense you have to be able to quickly pointed how its working ways might be coming short . this learning impact measurement becomes such a vital part of the l& d toolbox

- Evaluating training effect create a language.
- Evaluating training effect connects invite with result.

EVALUATING TRAINING & DEVELOPMENT EFFECTIVENESS

1. Performance based means benefits gained are better indicates of training cost effectiveness.
- 2.The benefits of the training by the cost of the training to determine roi.

1.2 ABOUT THE POWER SECTOR IN INDIA

GROWING DEMAND

India is the third –largest producer and consumer of electricity worldwide, with an installed power capacity of 411.64 GW as of January 31, 2023.

*Growing population along with increasing electrification and per-capita usage will provide further impetus. Power consumption in India in December 2022 logged an 11% growth to 121.19 billion units

ATTRACTIVE OPPORTUNITIES

*In Union Budget 2023-24, the government allocated US\$ 885 million (Rs. 7,327 crore) for the solar power sector including grid, off-grid, and PM-KUSUM projects.

*To meet India's 500 GW renewable energy target and tackle the annual issue of coal demand supply mismatch, the Ministry of Power has identified 81 thermal units which will replace coal with renewable energy generation by 2026.

*100% FDI allowed in the power sector has boosted FDI inflow in this sector.

*Schemes such as Deen Dayal Upadhyay Gram Jyoti Yojana (DDUGJY) and Integrated Power Development Scheme (IPDS) are expected to augment electrification across the country.

HIGHER INVESTMENTS

*As per the National Infrastructure Pipeline 2019-25, energy sector projects accounted

POWER INDUSTRY REPORT

Feb, 2023

INTRODUCTION

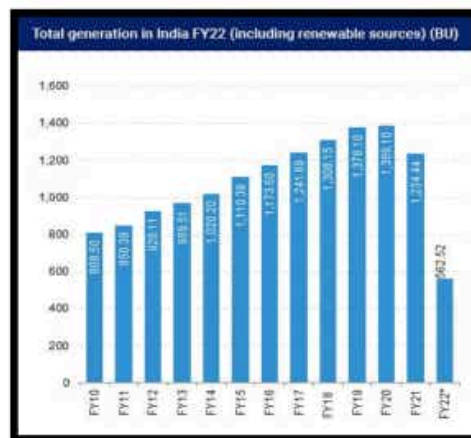

Power is among the most critical components of infrastructure, crucial for the economic growth and welfare of nations. The existence and development of adequate power infrastructure is essential for sustained growth of the Indian economy. The fundamental principle of India's power industry has been to provide universal access to affordable power in a sustainable way. The Ministry of Power has made significant efforts over the past few years to turn the country from one with a power shortage to one with a surplus by establishing a single national grid, fortifying the distribution network, and achieving universal household electrification.

India's power sector is one of the most diversified in the world. Sources of power generation range from conventional sources such as coal, lignite, natural gas, oil, hydro and nuclear power, to viable non-conventional sources such as wind, solar, agricultural and domestic waste. Electricity demand in the country has increased rapidly and is expected to rise further in the years to come. In order to meet the increasing demand for electricity in the country, massive addition to the installed generating capacity is required. India was ranked fourth in wind power capacity and solar power capacity and fourth in renewable power installed capacity, as of 2021. India is the only country among the G20 nations that is on track to achieve the targets under the Paris Agreement.

MARKET SIZE

India is the third-largest producer and consumer of electricity worldwide, with an installed power capacity of 411.64 GW as of January 31, 2023. As of January 31, 2023, India's installed renewable energy capacity (including hydro) stood at 168.4 GW, representing 40.9% of the overall installed power capacity. Solar energy is estimated to contribute 63.3 GW, followed by 41.9 GW from wind power, 10.2 GW from biomass, 4.92 GW from small hydropower, 0.52 from waste to energy, and 46.85 GW from hydropower. The non-hydro renewable energy capacity addition stood at 4.2 GW for the first three months of FY23 against 2.6 GW for the first three months of FY22. With electricity generation (including renewable sources) of 1,359.21 BU in India up to January, 2023 in the current fiscal year FY23, the country witnessed a growth of 10.08% YoY. According to data from the Ministry of Power, India's power consumption increased 11% YoY in December, 2022 to 121.19 BU. The peak power demand in the country stood at 205.03 GW in December, 2022.

DEVELOPMENTS/INVESTMENTS

Total FDI inflows in the power sector reached US\$ 16.57 billion between April 2000-December 2022. Some major investments and developments in the Indian power sector are as follows:

- In February 2023, Tata Power inaugurated 'Divyang' a managed customer relations centre in Mumbai, which is a first among Indian power utilities.

- In January 2023, the Union Cabinet (CCEA) approved investment of US\$ 315 million (Rs. 2,614 crores) for SJVN's 382 MW Sunni Dam Hydro Project.
- In January 2023, President of India laid foundation stone of SJVN's 1000 MW Bikaner Solar Power Project in Rajasthan.
- In August 2022, Norfund, who manage the Norwegian Climate Investment Fund, and KLP, Norway's biggest pension company, signed an agreement to buy a 49% share of a 420 MW solar power plant in Rajasthan for Rs. 2.8 billion (US\$ 35.05 million).
- In August 2022, Tata Power Green Energy Limited (TPGEL), a wholly-owned subsidiary of Tata Power, commissioned a 225MW hybrid power project in Rajasthan.
- In July 2022, NTPC signed a MoU with MASEN (Moroccan Agency for Sustainable Energy) for cooperation in the renewable energy sector.
- In March 2022, Adani Solar and Smart Power India (SPI), a subsidiary of Rockefeller Foundation, signed a non-financial and non-commercial MoU promote the usage of solar rooftop panels in rural India.
- In February 2022, Kolkata-based Eminent Electricity Distribution Ltd., a subsidiary of CESC Limited, bid Rs. 871 crore (US\$ 113.24 million) to take over Chandigarh's power supply department, which was approved and the transition will happen by the end of March.
- SJVN Limited is looking to develop 10,000 MW solar power projects inviting investment of Rs. 50,000 crore (US\$ 6.56 billion) in the next five years in Rajasthan.

GOVERNMENT POLICIES & INITIATIVES

The Government of India has identified the power sector as a key sector of focus to promote sustained industrial growth. Some initiatives by the Government to boost the Indian power sector are as below:

To encourage rooftop solar (RTS) throughout the country, Ministry New and Renewable Energy has developed a National Portal wherein any residential consumer from any part of the country can apply for rooftop solar without waiting for Discom to finalize tender and empanel vendors. Since the launch on July 30, 2022, the total number of applications received on the national portal is for 117 MW solar capacity and the feasibility of more than 18 MW projects is granted.

- Production Linked Incentive Scheme (Tranche II) on 'National Programme on High Efficiency Solar PV Modules', with an outlay of US\$ 2.35 billion (Rs. 19,500 crore) was approved and launched.
- Electrification in the country is increasing with support from schemes like Deen Dayal Upadhyay Gram Jyoti Yojana (DDUGJY), Ujwal DISCOM Assurance Yojana (UDAY), and Integrated Power Development Scheme (IPDS).

ROAD AHEAD

In the current decade (2020-2029), the Indian electricity sector is likely to witness a major transformation with respect to demand growth, energy mix and market operations. India wants to ensure that everyone has reliable access to sufficient electricity at all times, while also accelerating the clean energy transition by lowering its reliance on dirty fossil fuels and moving toward more environmentally friendly, renewable sources of energy. Future investments will benefit from strong demand fundamentals, policy support and increasing government focus on infrastructure. The Central Electricity Authority (CEA) estimates India's power requirement to grow to reach 817 GW by 2030. Also, by 2029-30, CEA estimates that the share of renewable energy generation would increase from 18% to 44%, while that of thermal energy is expected to reduce from 78% to 52%. The government plans to establish renewable energy capacity of 500 GW by 2030.

1.3 ABOUT THE COMPANY PROFILE

VIDYUT BHABAN

WBSEDCL West Bengal State Electricity Distribution Company (WBSEDCL) is proud to bring smiles to millions of people across the State by providing quality power service and a bouquet of customer friendly initiatives. Power Distribution: WBSEDCL serves over 2.03 Crore Consumers spread over 87,000 sq km., with more being added every day from hills to seas, particularly in remote and rural areas. The number of Consumers has doubled in the past 5 years. Consumer Services: Online connection, Central Data Centre, Zonal call centres, e-payment through Debit/Credit card / Net Banking & other e-services, pre-paid and remote metering automated kiosks, grievance redressal, single- window services and prompt restoration of power during breakdowns. With the launch of Vidyut Sahayogi App, WBSEDCL services are at the fingertips of Consumer. Energy Management WBSEDCL is the nodal agency for the Bureau of Energy Efficiency (BEE) to promote energy efficiency in West Bengal,. Employee Motivation

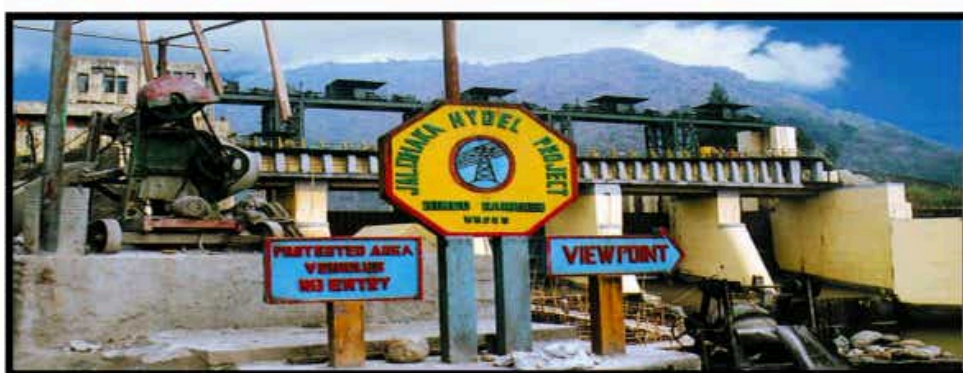

Excellent work culture, professional management, worker 'participation and welfare measures make WBSEDCL one of the best places to work. WBSEDCL .WBSEDCL one of t provides power to 96% of West Bengal, catering to every sector from ordinary villages to huge industrial units . It serves a customer base of more than 84 lakh across West Bengal. The service network spans over 5 zones ,17 Regional offices, 53 Distribution Divisions & 459 customer care centre. These are indeed exciting times for the Company, given its rapid progression from providing engineering solutions, to solving complex customer challenges, to providing innovative solutions.WBSEDCL has implemented Enterprise Resource Planning – SAP in Financial Accounting & Control, Material Management , HR with Payroll , Plant Maintenance & project system. After successful implementation of Purulia Pumped Storage Project in 10th Plan period with a capacity of 900 MW hydel power, the Company has taken up the ambitious plan of implementing Turga Pumped Storage Project in the 13th Plan period with installed capacity.

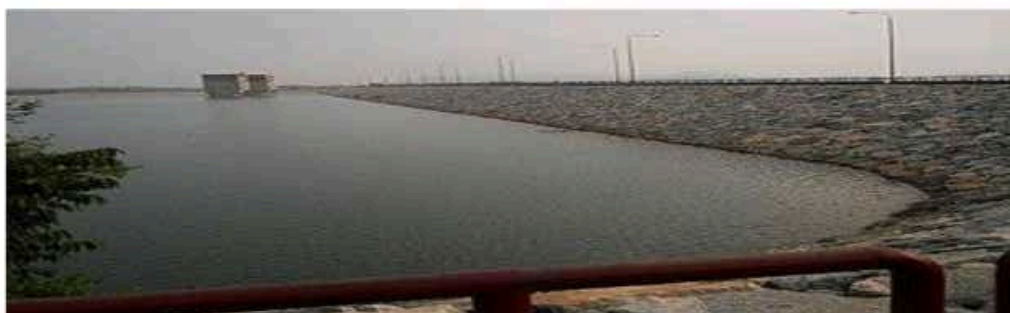

For solving complex customer challenges and for providing more efficient service to the consumers, a Project titled Integrated Power Development Scheme for strengthening of sub transmission and Distribution networks , metering of Distribution transformers etc. in the urban areas has been undertaken . A program for system improvement under Sech Bandhu Scheme has also been conceived for rural areas . WBSEDCL is innovating and embarking upon an IT – enabled system across the organisation to ensure greater engineering predictability and to position itself into the best utility in the country in terms of customer service, efficiency and financial viability.

1.3.1 HISTORY OF WSEDCL

1st May 1955 WBEB West Bengal Electricity Board was established then 1996 WBPDCCL has been reformed Power Distribution Company Limited. Then the year 2007 WBSCL was established in new ways. The Government of West Bengal unbundled the erstwhile West Bengal State Electricity Board (WBSEB) into two companies, West Bengal State Electricity Distribution Company Limited (WSEDCL) and West Bengal State Electricity Transmission Company Limited .

The main business of WBSCL is distribution and hydro generation of electricity. It is also the nodal Agency of the Government of West Bengal for undertaking Rural Electrification task in the State with objective of providing access of electricity to all rural households in the state in line with the National Rural Electrification Policy. The Company is managed by a Board of Directors comprising twelve members out of which seven are Executive Directors including Chairman & Managing Director. Besides one Woman Director and four Independent Directors constitute the Board.

The main business of WBSEDCL is distribution and hydro generation of electricity. It is also the Nodal Agency of the Government of West Bengal for undertaking the Rural Electrification task in the State with the objective of providing access to electricity to all rural households in the state in line with the National Rural Electrification Policy. After the successful implementation of the Purulia Pumped Storage Project in the 10th Plan period with a capacity of 900 MW hydel power, the company has taken up the ambitious plan of implementing the Turga Pumped Storage Project in the 13th Plan period with an installed capacity of 4 x 250 MW.

1.3.2 MAJOR BUSINESS

WEST BENGAL STATE ELECTRICITY DISTRIBUTION COMPANY LIMITED

A Government Of West Bengal Enterprise

WEST BENGAL STATE ELECTRICITY DISTRIBUTION COMPANY LIMITED (WBSEDCL) is a wholly-owned profit-making Government of West Bengal Enterprise, engaged in the business of Hydel Generation and Power Distribution in major parts of the state of West Bengal with Customer Base exceeding 2.22 crores (as on March 2023), Employee Strength of around 12529 plus (regular employees as on March 2023), Outsourced Labours : 33500 approx (as on March 2023) and Annual Turnover of 30,000 Rs. in crores 2021-22.

INFORMATION TECHNOLOGY OF WBSEDCL : IT & C Wing is entrusted for Planning , Development , Implementation and Performance Monitoring of state - of the - art and user - friendly Information Technology and Communication Application Systems as per Business Process re - engineering and Organizational Structure , in an integrated fashion , across WBSEDCL's Organizational functions and processes , thereby enabling achievement of its performance objectives and goals as per changed business requirements in regulatory and competitive environment ensuring use of all IT & Communication Equipment conforming to security safety and environmental regulations and standards .

1.3.3 ACHIEVEMENTS

- Metering , Billing and Collection : SAP - ISU based Metering , Billing and Collection system has been implemented throughout West Bengal
- Meter Data Acquisition System : MDAS implemented for all Feeders and HT Consumers throughout West Bengal and all the DTRS under R - APDRP , Part - A Towns.
- Geographical Information System : Mapping of the electrical network from 11KV to 230V and Consumer indexing has been completed for R - APDRP , Part A Town.
- Energy Audit : Sub - station - wise , Feeder - wise and DTR - wise generation of Energy Audit report has been implemented
- Mobile App : Mobile App " Vidyut Sahayogi " has been developed by engineers of IT & C Cell
- Complaint on Electricity : ts except common area overlapping with CESC # SCADA / DMS : WBSEDCL has undertaken the
- SCADA / DMS:project which is being implemented in sub - stations under Kolkata UA . Asansol UA and Siliguri towns for enhancing operational
Implementation inform short code 1912 for electricity complain efficiency of Distribution Network

1.3.4 AWARDS

- ☐ Purulia Pump Storge Hydel Project Award at ICC India Energy Summit - 2018
- ☐ Best Performing Power Distribution Utility Award at CBIP Day Programme - 2019
- ☐ "One of the Best Innovations" in "Energy Storage through Hydro" Award at ICC India Energy Summit - 2018
- ☐ Best Power Utility Award at ICC India Energy Summit - 2018
- ☐ Best Power Utility at ICC India Energy Summit- 2017
- ☐ PLATINUM STATE AWARD- 2017
- ☐ IPPAI Power Awards - 2017
- ☐ SKOCH Award Of MERIT-2016
- ☐ India Power Award-2016
- ☐ India Energy Summit Award-2016

Purulia pump storage Hydel project Award at ICC India Energy summit 2018

Best Performing Power Distribution Utility Award at CBIP Day Programme - 2019

SKOCH Award Of MERIT-2016

IPPAI Power Award -2017

India Power Award-2016

SAP ACE Award- 2015

1.3.5 Ownership

West Bengal State Electricity Distribution Company Limited (WBSEDCL) under the ownership of the Government of West Bengal. WBSEDCL was established in 2007 following the unbundling of the state electricity board of West Be

1.3.6 GENERATION, VISION & MISSION OF THE COMPANY

GENERATION

Playing the leading role in Hydro Power sector, WBSEDCL has stressed upon development of conventional type Major & Small Hydro - Electric Projects and Mega Pumped Storage type Hydro Electric Projects to bring down the adverse Hydro Thermal ratio and to mitigate Perak Power demand of the State . Out of 1,474 MW of identified potential in conventional Hydro Power sector 1753 MW Hydro Projects and out of 4810 MW identified potential in Pumped Storage sector, 900 MW Purulia Pumped Storage Project have been successfully developed and are operation by WBSEDCL One Thousand (1000) MW Turga Pumped Storage Project, cleared by the CEA, has been taken up for implementation within 2022-23. Development of MW Bandunala Pumped Storage Project, along with some small Hydro Electric projects, are in the pipeline. Giving impetus on development of Renewable Energy particularly Solar Energy , WBSEDCL has taken firm and targeted initiative for development of Large as well as Small Scale Grid Connected Solar PV Power Plants . The Canal Bank Solar Power Project (10 MW near Teesta Canal Fall Hydro Electric Power Plant , Stage - I in Uttar Dinajpur district has been commissioned in August , 2016. Three (3) 10 MW Solar PV Power Projects in Purulia and Bankura districts are under implementation . Five solar projects of cumulative capacity of 40 MW to be set up in Purulia and Paschim Medinipur have also been conceived and project proposals submitted to the State Government for acceptance. Grid Connected Rooftop Solar PV Plants of 10 kWp each have been installed at 92 schools / colleges and another 200 schools / colleges are undergoing to have same facility soon.

Tender has been invited for installation of Grid Connected Solar Rooftop Plants of total 15 MW capacity under IPDS (5 MW) and ' ALOSHREE (10 MW) Scheme on Government Buildings . Setting up of 500 MW Solar Park in 3 districts is in the pipeline.

1.3.7 VISION & MISSION OF THE COMPANY

Vision - To Be The Best Power Utility In India

To be the best power utility in India . In terms of customer services , efficiency and financial viability . To adopt and use the best HR practices from national and international top performers to develop a dynamic, efficient, diversified, dependable, self-driven human resource, capable of making WBSEDCL the best Power Utility in the country.

Mission - Our Mission is to supply

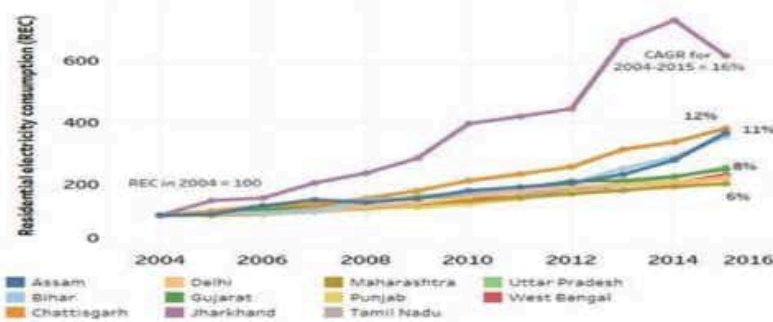

Uninterrupted and quality power to all .To induct quality human capital and develop a trained, focused and motivated team capable of rendering services in all conditions to meet the business objectives of the company and expectations of the consumers.

1.3.8 Core values –

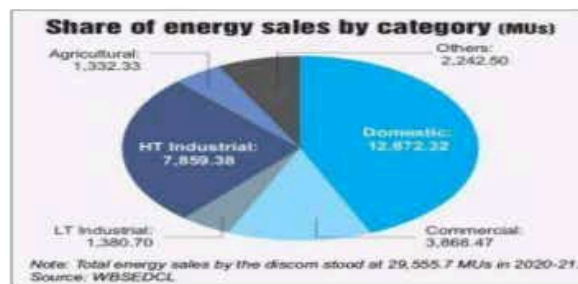

- ☐ Nurture a cohesive & a vibrant professional environment that fosters a unified creative workforce and promote employee participation in decision-making process
- ☐ Implement best suited modern technologies and impart knowledge on best HR practices amongst its employees to achieve excellence in developing core professional competencies
- ☐ Women empowerment at all levels of the organization with a focus on gender equality
- ☐ Fostering learning, creativity and multi-disciplinary team-work supported by reward and recognition
- ☐ Practicing best ethical practices, integrity & responsiveness to our customers
- ☐ Integration of training with the business strategy
- ☐ To maintain a safe work place for our workforce across the organisation

1.3.9 Financial Performance:

As a wholly owned enterprise of govt. of west Bengal, WBSEDCL is a profit-making organization but not listed in stock market.

WBSEDCL's revenue gap has decreased from Rs 0.019 per unit in 2019-20 to Rs 0.011 per unit in 2020-21. During 2020-21, the company recorded a revenue of Rs 228.31 billion, an increase of about 38.32 per cent over the Rs 165.06 billion in the previous year. The company's net profit decreased by around 23.89 per cent and stood at Rs 480.5 million in 2020-21 as compared to a profit of about Rs 631.3 million in the previous year. The utility's capital expenditure stood at Rs 35.99 billion in 2020-21, increasing at a CAGR of 25.06 per cent from Rs 14.71 billion during 2016-17. As of March 2021, the company's outstanding debts stood at Rs 152.62 billion and the debt- equity ratio stood at 3.9. Its payback period was 119 days in 2020-21. The total expenditure stood at Rs 261.45 billion and the power purchase cost contributed the largest share of expenditure at Rs 212.52 billion or 81.29 per cent. In the year 2020-21, WBSEDCL's return on equity and return on net worth stood at 2 per cent each. While the company's return on capital employed stood at 30 percent.

1.3.10 Future plans

The planned a Rs 131 billion for 2022-23 to 2024-25. This will be mostly spent on modernization of the distribution infrastructure with information and operation technology integration. In terms of network expansion, the company has planned an addition of 11,450 ckt km distribution lines, and transformer capacity of 7,500 MVA between 2022-23 and 2026-27. It has also planned 2,050 ckt km of underground cabling by 2026-27. Further, the company plans to install 3.7 million smart meters between 2022-23 and 2026-27. In January 2022, the World Bank extended a \$135 million loan to WBSEDCL to improve efficiency and reliability of electricity supply in West Bengal. The project aims to strengthen distribution networks, invest in smart-grid technologies and ensure financial sustainability of WBSEDCL. The project will be financed by the West Bengal government and loans from the Asian Infrastructure Investment Bank and the World Bank. The \$135 million loan from the International Bank for Reconstruction and Development is a variable spread loan that has a maturity of 17 years, including a grace period of seven years. As part of the project, HVDS and AB Cabling would be undertaken in around 13 highest loss-making districts. Technology and capacity upgrades in WBSEDCL's communication infrastructure distribution automation technologies, among other things. WBSEDCL will also be implementing the Revamped Distribution Sector Scheme, which was launched in July 2021 by the MoP to help discoms improve their operational efficiencies and financial sustainability. The company plans to develop a 200 MW solar park project at Goaltore, Paschim Medinipur with financial assistance worth Rs 6 billion from KfW Germany. The first phase (125 MW) of the project is expected to be commissioned by June 2024.

CONCLUSION

Going forward, WBSEDCL has ambitious capex, capacity addition and technology plans in place that will assist in achieving its aim of becoming more commercially viable and self-sustaining in future, in addition to providing reliable power to consumers.

1.3.11 LEADERSHIP - TOP MANAGEMENT ACTIVITY OF WBSEDCL

CHAPTER: 7 RECOMMEDATION

RECOMMENDATION

WBSEDCL is a big organization & it has a huge number of human resources. Organization is already providing effective training to its employees . My recommendations about the training programs are -----

WBSEDCL should arrange minimum two training session every year for its employees according to their performance.

As the training has impact to increase the performance of the employees, WBSEDCL should provided more emphasis to evaluate the performance of the employees after training so that the effectiveness of the training can be measured .

WBSEDCL should take Strict action against those employees who don't attend the training sessions deliberately.

WBSEDCL should provided training to their employees according to the performance to the individual of the employees.

CHAPTER:8 CONCLUSION

CONCLUSION

I am thankful to all the members of WBSEDCL SOUTH DIVISION, BURDWAN to give me an opportunity to take a valuable training . I am privileged to have been associated with such a big organization . Pursuing MBA (HR) from ‘ THE UNIVERSITY OF BURDWAN’ provides me the opportunity to test & implement the theoretical knowledge so far Training & development has direct impact on the organization growth & development .WBSEDCL is so much serious about training programs & employees also want to develop their skills through those training sessions . Most of the employees believe that their performance has increased a lot. They become efficient on their work. Organization should continue this type of training sessions to improve the skill of the human resources . organization can utilize the human resources in an optimum way by providing effective training .The industrial exposure will be helpful for my career . We hope that company will continuously grow in future also. Great wishes to WBSEDCL for its future activities .
